NOTICE.

—♦—

The National Association of Wool Manufacturers having decided to make an Exposition of the products of their special industry, were generously invited by the American Institute to exhibit under their auspices, at the Thirty-eighth Annual Fair of the Institute, to be held in the city of New-York in the fall of 1869.

The object of the Exposition was to make known the extent, variety, and actual condition of the wool industry of the United States, rather than to adjudge the comparative merits of competing manufacturers; exhibitors, therefore, were requested to exhibit mainly such articles as they are accustomed to make for the general market. Exhibitors were informed that an official catalogue would be published, in which the name or business card of every exhibitor and a designation of his contributions would appear. The present catalogue is made in conformity with this promise.

The Executive Committee of the National Association of Wool Manufacturers have the satisfaction to believe that the display of the goods herein designated is such as will serve to make known to the American people their dependence upon their own productions, and will tend to create that public sentiment in favor of the products of our own soil and labor which is indispensable to the proper success of our manufactures, and at the same time will, by emulation and example, elevate the standard of the American wool industry and its dependencies.
